THE-REMOTE INSTRUCTIONS
a universal wildlife feeder remote control

RECEIVER INSTRUCTIONS
--Drill 7/16” hole into control box to mount receiver with antenna pointing down.
Receiver is held in control box by the finger nut under the antenna
--Connect black/red wires to 6v or 12v power source
--THE-REMOTE is designed to plug directly into THE-TIMER but can operate any 6v or 12v motor
--For THE-TIMER, simply plug marked connectors into the motor and THE-TIMER

![Diagram](image)

--For other brands of timers, splice in only the motor connector being sure the polarity is correct.

TRANSMITTER INSTRUCTIONS
--Hold transmitter with antenna pointing upwards and depress orange button to activate remote.

INSTALLATION AND TIPS
--Mount receiver with antenna pointing down for best reception.
--Operate transmitter with antenna pointed up.
--With correct conditions THE-REMOTE has a 175 + yard range

Call your local dealer for additional transmitters and replacement batteries.
